

HUMBERTO BELLO

Miami, FL | 305-570-7920 | humberto.bello@protonmail.com | linkedin.com/in/humbertobello

PROFESSIONAL SUMMARY

Director-level engineering leader with 20+ years scaling engineering teams, delivering high-quality software, and modernizing platforms across telecom, insurance, healthcare, and SaaS. Track record of leading distributed and remote teams, managing complex system and API integrations, and aligning engineering execution with company strategy. Hands-on technical depth in software development, technical architecture, and cloud-native delivery, with consistent results building scalable solutions and fostering cross-functional collaboration.

CORE SKILLS

Leadership and Management: Engineering Management, Team Leadership, Technical Leadership, Cross-functional Team Leadership, Remote Team Leadership, Distributed and Global Teams, Engineering Strategy, Stakeholder Management, Mentoring, Project Management, Program Management, Vendor and Offshore Delivery, Operations Management

Software Development: Java, Python, JavaScript, TypeScript, Kotlin, Scala, Node.js, Spring Boot, FastAPI, ReactJS, NextJS, .NET, REST APIs, Microservices, Coding Best Practices, Test Automation, CI/CD

Technical Architecture: Solution Architecture, Enterprise Architecture, Cloud-Native Architecture, Microservices, Service-Oriented Architecture (SOA), Event-Driven Architecture, Domain-Driven Design (DDD), API Management

System and API Integration: REST APIs, Apigee, Apache Kafka, Apache Camel, Apache NiFi, RabbitMQ, MQTT, Enterprise Integration Patterns, Webmethods, Salesforce CRM API, SAP APIs, HL7 FHIR

Cloud and Infrastructure: AWS (EC2, ECS, EKS, IAM, VPC, S3, DynamoDB, RDS, Aurora), Azure (AKS), Google Cloud Platform, Kubernetes, Terraform, Jenkins, GitHub, GitLab

Data and AI: PostgreSQL, Oracle DB, SQL Server, MongoDB, Redis, Apache Cassandra, Apache Spark, Generative AI, Retrieval-Augmented Generation (RAG), LangChain, Amazon Bedrock, Azure OpenAI

Methodologies: Scaled Agile Framework (SAFe), Scrum, Kanban, Agile Software Development, SDLC, Threat Modeling

Tools: Jira, Confluence, Figma, Notion, Linux

Domain Experience: SaaS, E-commerce, Telecommunications, Insurance, Banking, Healthcare, Payment Processing, Supply Chain

PROFESSIONAL EXPERIENCE

Principal Consultant, Fractional Architecture and AI Advisory

Independent | Doral, FL | Aug 2025 - Present

- Accelerated MVP ideation-to-delivery using AI-native tooling (Cursor, Replit, Claude, Codex) for a Canadian bookkeeping and accounting client (Pereira CPA Associates), shipping the main portal and CRM.
- Assessed AI readiness and identified automation opportunities across data engineering, RAG, and AI pipeline workflows for a biotech client (scispot.io).

Principal Engineer, Associate Director, Digital Engineering and IoT

Cognizant Technology Solutions | Miami, FL | Apr 2021 - Jul 2025

- Scaled a distributed engineering organization from 8 to 20 engineers across 3 countries, delivering cloud migration and platform modernization programs for Fortune 100 clients.
- Architected and operationalized an event-driven supply chain visibility platform for a Fortune 100 retailer, built on ReactJS, Apache Camel, and Apache Kafka, providing near-real-time support across 13,000 store locations.
- Led on-premises to cloud-native migration of event streaming platforms to AWS, increasing system reliability by 35%.
- Designed a Retrieval-Augmented Generation (RAG) document management system using LangChain, Python, ReactJS, Azure OpenAI, and Zilliz Vector DB, replacing a manual document retrieval workflow.
- Designed and implemented event-driven microservices and micro front-end architectures across AWS, GCP, Apigee, and Azure.
- Served as Scrum Master across 34 sprints and facilitated 3 Program Increment (PI) Planning events, coordinating delivery across multiple product owners and business stakeholders.
- Established Infrastructure-as-Code (IaC) provisioning templates using Terraform for AWS environments.

Senior Solutions Architect

Concentrix | Doral, FL | Oct 2020 - Apr 2021

- Served as technical lead for the mobile wearable Agile Release Train (ART) at a major wireless carrier serving 2M+ customers.
- Delivered architecture runway for wearable product features, including CI/CD pipeline design and test automation framework.
- Prioritized program-level EPICs using Weighted Shortest Job First (WSJF) scoring across 3 Program Increment Planning cycles.
- Designed an event streaming migration from on-premises Kafka to AWS for a global fintech provider, producing L1 architecture for real-time payment network event processing.

Manager, Technical Architecture and Delivery

Accenture | Doral, FL | Jan 2019 - Jun 2020

- Designed and implemented an API management and security layer (Apigee plus Istio) governing microservices controlling robotic surgical devices at a major pharmaceutical manufacturer; stack included Kubernetes, Azure, Spring Boot, Kafka, and HL7 FHIR.
- Led design, development, and CI/CD automation for a mobile personal banking app at a Fortune 500 bank, enabling transactions and legacy mainframe integration.
- Piloted Amazon Connect at a major health insurer, defining security guardrails, service catalog design, and reference architecture aligned to the AWS Well-Architected Framework.
- Led Apigee Hybrid deployment at a major retail client, including Kubernetes cluster infrastructure design.

Digital Operations Architect

Millicom | Doral, FL | May 2018 - Nov 2018

- Owned the regional Digital Services Platform enabling digital adoption across 5 countries with 46M mobile subscribers.
- Designed a microservices architecture supporting upselling and cross-selling capabilities tied to a \$4B annual run rate.
- Led API management delivery using Apigee Edge with SLA and KPI tracking across offshore implementation teams.

Independent Consultant

Self-Employed | Doral, FL | Jun 2017 - Dec 2018

- Sabbatical period providing part-time technical consulting and implementation services for small businesses in Germany and Venezuela, including ecommerce site delivery and operational reporting.

Lead Engineer

International Wellness Marketing and Media Company | Miami, FL | May 2015 - Jun 2016

- Designed and implemented financial transaction APIs using a microservices architecture built on Java, Spring Boot, Redis, and MySQL, supporting 25,000 spas and wellness facilities.
- Led engineering best practices and mentored software engineers across 18 Scrum sprints.

Senior Manager, Production Systems

Verizon | Doral, FL | Sep 2007 - Apr 2015

- Built and led a Production Systems Engineering team of 8 employees and 4 offshore contractors supporting the largest Mobile Virtual Network Operator (MVNO) in the US, a \$9B annual revenue platform serving 25M+ customers across 8 brands.
- Delivered all carrier integration projects with AT&T, T-Mobile, Alltel, Claro, and Sprint, including API upgrades and releases, using enterprise Java/J2EE and web services.
- Tuned JVM for a Java CRM platform and APIs, sustaining 35,000 transactions per second at peak load; cut end-of-month batch fulfillment time by 300%, and reduced offline data encryption processing from 3 months to 4 days.
- Designed and implemented a common integration framework supporting REST, SOAP, and XML-RPC, built on Spring Framework using Enterprise Integration Patterns.
- Automated the API deployment pipeline using Java, Ant, and Unix scripting; executed data center failovers with near-100% effectiveness while delivering 100% of core system releases.

Senior Consultant

BTI Services (Contract) | San Juan, PR | Jan 2007 - Oct 2007

- Developed and presented an ITIL implementation strategy for a Puerto Rico government agency.

Staff Systems Architect

Universal Insurance Group | San Juan, PR | Sep 2001 - Dec 2006

- Led the Technology Renewal program, the first enterprise-level Service-Oriented Architecture (SOA) in the Caribbean insurance industry, achieving 15% consolidation of enterprise applications and a 7% reduction in loss ratio through a business rules engine for underwriting.
- Founded and managed the Systems Architecture and Business Intelligence team.
- Designed and built Universal Autocare, a full-stack extended warranty management system deployed across 40+ dealer and distributor sites, processing 1,300+ contracts monthly.
- Built the Universal Mobile Solution, the first mobile insurance quote engine for Palm OS, BlackBerry, and Java-powered devices.

Java Application Architect

Cautus Networks | Miami, FL | Sep 2000 - Sep 2001

- Served as application architect and Java SME for one of the first ERP solutions built on a SaaS architecture (secureaccounting.net), delivering features using Java Swing and J2EE.

Senior Consultant, CRM Solutions

Cambridge Technology Partners | Caracas, Venezuela | May 1999 - Sep 2000

- Implemented CRM sales and marketing solutions at Banco Mercantil using Siebel CRM and Java middleware for mainframe integration, enabling one-to-one marketing for 3M+ clients and increasing campaign effectiveness by 65%.

Researcher and Professor, Computer Science

Universidad Simón Bolívar | Caracas, Venezuela | Sep 1996 - May 1999

- Taught and researched algorithms, data structures, compiler theory, memory management, and programming language semantics.

EDUCATION

Master of Science (MSc), Computer Science, Universidad Simón Bolívar, Venezuela, Oct 1999

Bachelor of Science (BSc), Computer Science, Universidad Simón Bolívar, Venezuela, May 1996

CERTIFICATIONS

- Certified Scrum Master (Scrum.org)
- Claude Code (Anthropic)
- Developing APIs with Google Cloud's Apigee (Specialization)
- Architecting with AWS
- SAFe for Architects 5.0
- Google Cloud Platform Fundamentals: Core Infrastructure
- Principles of Reactive Architecture (IBM)
- Machine Learning (Coursera)
- IT Project Management (New Horizon)
