

HUMBERTO BELLO

Miami, FL | 305-570-7920 | humberto.bello@protonmail.com | linkedin.com/in/humbertobello

PROFESSIONAL SUMMARY

Senior engineering leader with 20+ years of experience building and operating Java-based enterprise platforms at scale across financial services, telecom, and healthcare. Proven track record growing distributed engineering organizations, owning multi-squad delivery outcomes, and driving cloud-native modernization in hybrid, regulated environments. Hands-on expertise in high-volume transactional and batch systems, event-driven microservices architecture, and operationalizing Generative AI in production. Experienced technology consultant with deep fintech and banking exposure — including a \$9B transactional platform supporting 25M+ customers.

CORE COMPETENCIES

Languages & Platforms: Java, Python, React, JavaScript, Kotlin, Spring Boot, Quarkus, .NET, NodeJS, SQL

Cloud & Infrastructure: AWS, Azure, GCP, Kubernetes, Terraform (IaC), Linux/UNIX, CI/CD, Jenkins, GitHub, GitLab

Architecture & Integration: Microservices, Event-Driven Architecture, Apache Kafka, REST/GraphQL APIs, API Management (Apigee), Domain-Driven Design

Generative AI & ML: GenAI in Production, RAG Pipelines, Agentic Architecture, Amazon Bedrock, Azure OpenAI, LangChain, LangGraph

Security & Compliance: PCI DSS, HIPAA, GDPR, OWASP, OAuth 2.0, Secure SDLC, Threat Modeling, IAM, SPIFFE

Leadership & Delivery: Engineering Management, Talent Development, Budget & Resource Oversight, SAFe/Scrum, Program Increment Planning, Stakeholder Alignment

PROFESSIONAL EXPERIENCE

Principal Consultant — Fractional Architecture & AI Advisory

Independent | Miami, FL

Aug 2025 – Present

- Accelerated MVP ideation-to-delivery for a bookkeeping SaaS client using AI-native tooling (Cursor, Claude, Replit), producing a customer-facing portal and CRM on an aggressive timeline.
- Assessed AI readiness and identified automation opportunities across data engineering, RAG pipeline design, and agentic AI workflows for a Biotech industry client.

Principal Engineer, Associate Director — Digital Engineering & IoT

Cognizant Technology Solutions | Miami, FL

Apr 2021 – Jul 2025

Led multinational engineering teams delivering enterprise-scale digital programs for Fortune 100 clients across telecom, insurance, and retail.

- Scaled distributed engineering organization from 8 to 20 engineers across 3 countries, managing delivery planning, resource allocation, and budget accountability for cloud migration and platform modernization programs.
- Architected an event-driven supply chain visibility platform on ReactJS, Apache Camel, and Apache Kafka for a Fortune 100 retailer — enabling near-real-time operational visibility across 13,000 store locations.
- Designed and deployed a Retrieval-Augmented Generation (RAG) document management system using LangChain, Python, ReactJS, and Azure OpenAI, operationalizing GenAI in a regulated production environment and replacing a fully manual retrieval workflow.
- Drove on-premises-to-cloud-native migration of event streaming platforms to AWS, increasing system reliability by 35% and enforcing secure design and compliance guardrails via Terraform IaC.
- Delivered microservices and micro front-end architectures on AWS, GCP, and Azure — including customer-facing application layers for high-volume consumer platforms — and served as Scrum Master across 34 sprints and 3 SAFe PI Planning events.

Senior Solutions Architect

Concentrix | Miami, FL

Oct 2020 – Apr 2021

- Led architecture runway and CI/CD pipeline design for a mobile wearable Agile Release Train at a major wireless carrier serving 2M+ customers.
- Designed event streaming migration from on-premises Kafka to AWS for a global fintech provider, producing L1 architecture for real-time payment network event processing at scale.

Manager, Technical Architecture & Delivery

Accenture | Miami, FL

Jan 2019 – Jun 2020

- Designed and implemented API management and security layer (Apigee + Istio) governing microservices for robotic surgical devices — stack: Kubernetes, Azure, Spring Boot, Kafka, HL7 FHIR — in a compliance-controlled regulated environment.

- Led design, development, and CI/CD automation for a mobile personal banking application at a Fortune 500 bank, integrating with legacy mainframe systems in a PCI DSS-governed environment.
- Piloted Amazon Connect at a major health insurer, defining HIPAA-aligned security guardrails and reference architecture per the AWS Well-Architected Framework.

Digital Operations Architect

Millicom | Miami, FL

May 2018 – Nov 2018

- Designed microservices architecture enabling digital BSS (Business Support System) adoption for a \$4B annual run rate telecom platform serving 46M mobile subscribers across 5 countries.
- Led API management delivery via Apigee Edge with SLA/KPI tracking; drove secure SDLC practices including threat modeling and vulnerability assessments of customer-facing digital properties.

Senior Manager, Production Systems

Verizon | Miami, FL

Sep 2007 – Apr 2015

Built and led an 8-person Production Systems Engineering team supporting the largest Mobile Virtual Network Operator (MVNO) in the US — a \$9B annual revenue, high-volume transactional and batch platform serving 25M+ customers across 8 brands.

- Owned end-to-end production operations for Java/J2EE platforms: performed log analysis, job scheduling, performance troubleshooting, incident response, and root-cause analysis for mission-critical transactional workloads.
- Tuned JVM and Java CRM platform APIs to sustain 35,000 transactions per second at peak load; automated batch job scheduling and API deployment pipeline using Java, Ant, and Unix scripting.
- Reduced end-of-month batch fulfillment time by 300% and cut offline data encryption processing from 3 months to 4 days through architecture optimization and automation.
- Executed data center failovers with near-100% effectiveness; delivered 100% of core system releases on time and within SLA/OLA compliance targets.
- Delivered all carrier integration projects with AT&T, T-Mobile, Sprint, Alltel, and Claro using enterprise Java/J2EE and web services, including API spec implementation and end-to-end validation with third-party providers.

EARLIER CAREER

Staff Systems Architect — Universal Insurance Group, San Juan, PR (2001–2006): Led first enterprise SOA in Caribbean insurance industry; founded Systems Architecture & Business Intelligence team; delivered multimillion-dollar integration programs with Tier 1 US insurers and financial institutions.

Senior Consultant, CRM Solutions — Cambridge Technology Partners, Venezuela (1999–2000): Implemented Siebel CRM with Java mainframe integration for 3M+ banking clients; increased campaign effectiveness 65% via data mining-driven segmentation.

EDUCATION

Master of Science (MSc), Computer Science — Universidad Simón Bolívar, Venezuela

Bachelor of Science (BSc), Computer Science — Universidad Simón Bolívar, Venezuela

CERTIFICATIONS

SAFe for Architects 5.0 | Certified Scrum Master (Scrum.org) | Architecting with AWS | Google Cloud Apigee API Development (Specialization) | Principles of Reactive Architecture (IBM) | Machine Learning (Coursera)
